CAPABILITY STATEMENT
DATAPLUZZ

NAICS CODES

518210: Data Processing, Hosting, and Related Services

541511: Custom Computer Programming Services

541511: Robotics process automation software design and development services

541512: Computer Systems Design Services

541512: Computer software consulting services or consultants

541519: Other Computer Related Services

541611: Administrative Management and General Management Consulting Services

611430: Professional and Management Development Training

CAPABILITY STATEMENT

OUR EXPERTISE SPANS ACROSS:

Data Analytics & Business Intelligence: Providing data-driven insights through advanced analytics, data visualization, predictive analytics, and business intelligence reporting.

Data Engineering: Proficiency in building scalable data architecture, managing large datasets, and ensuring seamless data integration across systems.

Governance & Compliance: Ensuring data quality, security, and compliance with relevant data protection regulations through structured governance frameworks.

Artificial Intelligence & Machine Learning: Application of AI and ML models to provide data-driven personalized recommendations and enhance decision-making.

Cloud Solutions: Expertise in designing and implementing cloud-based data solutions, offering scalability and cost-effectiveness for businesses.

Data Strategy Consulting: End-to-end data strategy to align initiatives with objectives and continuous assessment business intelligence platforms to maximize ROI and reduce costs.

Software, Web & Mobile Development: Full-cycle development of software, web applications and mobile solutions to drive digital transformation.

Business Process Automation: Implementation of intelligent automation to streamline processes, reduce manual workloads and improve operational efficiency.

Training & Capacity Building: Offering customized training programs to upskill teams in data management, analytics, and cloud solutions.

DIFFERENTIATORS

Industry-Agnostic Expertise: Proven track record of delivering tailored data solutions across multiple industries including finance, non-profit, public sector, retail, consumer services, telecommunications, media and entertainment and logistics.

Comprehensive Data Solutions: One-stop-shop for all data and technology needs from data strategy and governance to analytics, software development, and AI, offering holistic solutions to meet diverse business needs.

Agile Approach: Our iteratives agile approach empowers you to quickly respond to changing requirements from users, reduce time to market and deliver functional solutions faster.

Co-creation with Clients: Collaborating closely with our clients throughout the development process to create tailored solutions, ensuring alignment with your unique needs while driving innovation and stronger ownership of the final product.

Expert Team: A team of seasoned data professionals and developers with extensive experience in data engineering, AI, business intelligence and custom software development.

Commitment to Security & Compliance: Ensuring all data and software solutions meet the highest security standards and comply with data protection regulations.
